## Projects

### iOS APP

July 2012 – August 2013

1. 布丁电影票 <https://itunes.apple.com/cn/app/bu-ding-dian-ying-piao-shou/id697729329?mt=8>  
buding movie ticket is my project in Innovation works buding company. I'm the major developer of v2.0, rewrite almost entire project source code, due to the UI and function changed a lot since v1.0. The App contains other movie coupon's common features such as the movie schedules, the cinema list, personal information management, buy ticket online(movie ticket for universal exchange & movie ticket for selected seat). Because this project is in 2012, so I used manually memory management. This project uses thrift framework to exchange data between frontend and backend.
2. 布丁优惠券 <https://itunes.apple.com/cn/app/mai-dang-lao-ken-ji-you-hui/id688786968?mt=8>  
buding coupon is my second project in Innovation works buding company. In this project my duty is to add new features. This app is a collection of all kinds of electronic coupon, users can search coupon, check coupon and use coupon with it.

### Lizi

July 2014 – Present

Lizi <https://itunes.apple.com/cn/app/nala-na-la-zui-zhuan-ye-zheng/id807013712?l=en&mt=8>  
Lizi is my project in Xinba tech.(HangZhou) Ltd. I attend this project after v2.1. Lizi is a online cosmetics market, along with the pc website [lizi.com](<http://www.lizi.com>). In this project I refactor most of the code, make the code clean and readable, reduce the work time when add new features.

### iOS APP

August 2013 – June 2014

1. 爱铂in <https://itunes.apple.com/cn/app/ai-boin/id726980709?mt=8>  
爱铂in is a company internal social network app. It contains company twitter, company contacts, personal contacts, publish commodities. I use CoreText to mixed image and text, use xmpp to implement the chat function(include one to one and group chat).
